rProject: R Project

Ivan Jacob Agaloos Pesigan

Description

A collection of functions to setup R (R Core Team, 2023) projects. This package is intended for personal use only.
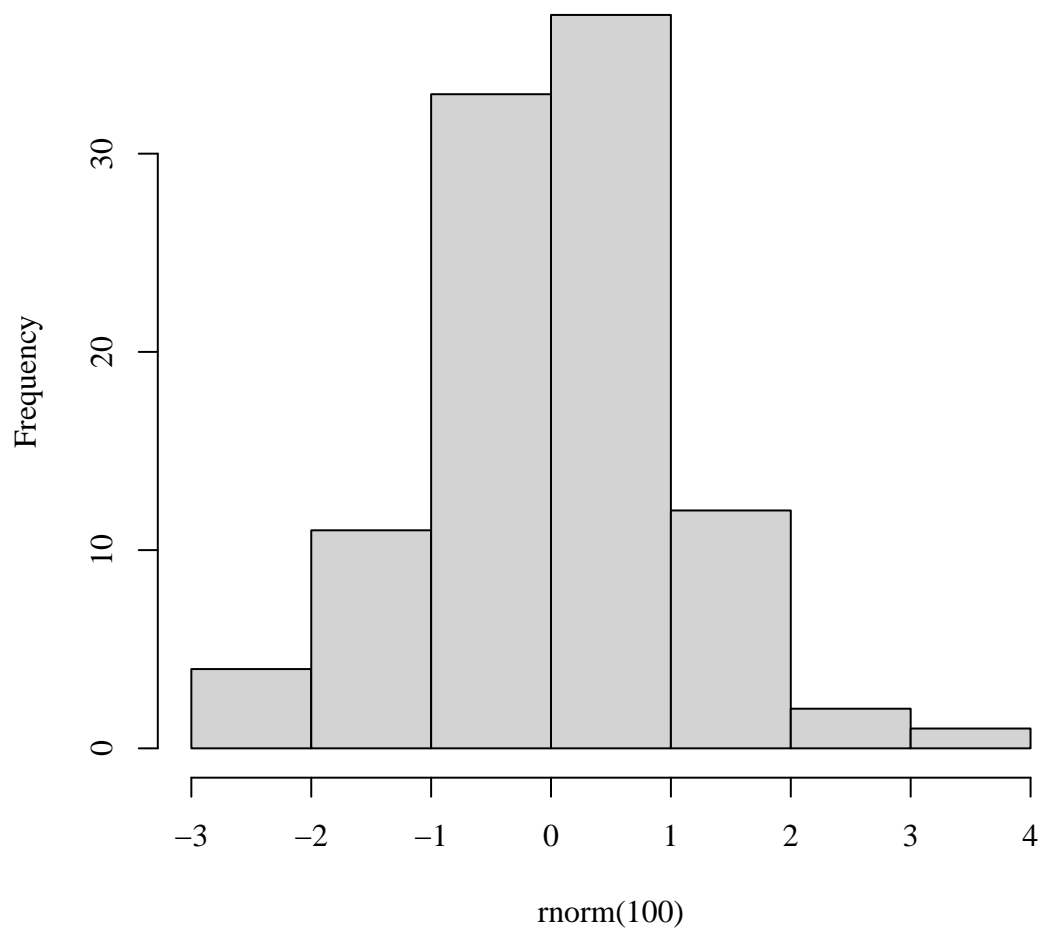

Installation

You can install the released version of **rProject** from GitHub with:

```r
install.packages("remotes")
remotes::install_github("ijapesigan/rProject")
```

```r
hist(rnorm(100))
```

Histogram of rnorm(100)

```
out <-    .PreambleBiblatex(
    path = root$find_file(
      ".setup",
      "latex",
      "bib"
```

```
      )
    )
fn <- root$find_file(
  "output.txt"
)
fileConn <- file(fn)
writeLines(out, fileConn)
close(fileConn)
```

More Information

See GitHub Pages for package documentation.
